

The Zing Advantage

ALL ADJUSTMENTS ARE TOOL-FREE

DUAL CONTROL

- BOTH FOOT AND/OR HAND CONTROL OF THE GAS SPRING LIFT

MULTI-ADJUSTABLE AND FORM TO FIT HEAD SUPPORTS

PORTABLE SIZE 1: UP TO 36", 36 LB WEIGHT CAPACITY
SIZE 1 RANGE: UP TO 44", 70 LB WEIGHT CAPACITY
SIZE 2 RANGE: 32"-60", 154 LB WEIGHT CAPACITY

REMOVABLE LATERAL SUPPORTS

- SQUARE PADS
- FLAT PADS
- CURVED PADS

PRONE POSITION LOCKOUT

- TO PREVENT GOING PAST VERTICAL
- TO ACCOMMODATE POSITIONING NEEDS

ROTATING HIP GUIDES

- HIP GUIDES FOLLOW AND ADAPT TO THE VARYING DEGREES OF ABDUCTION

GAS SPRING LOCKOUT

- PREVENTS AN INADVERTENT CHANGE OF POSITION, ESPECIALLY IMPORTANT WHEN AROUND OTHER CHILDREN

MULTI-USE TRAY

- A MULTI-USE TRAY THAT IS ANGLE ADJUSTABLE AND SWINGS AWAY EITHER DIRECTION
- TRAY CAN REMAIN ATTACHED DURING TRANSFERS
- MORE ACTIVITIES ARE POSSIBLE BY SWINGING TRAY AWAY DURING STANDING THERAPY
- TWO ATTACHMENT POINTS PROVIDE STABILITY AND STRENGTH WHEN IN POSITION OR SWUNG-AWAY

MULTI-ADJUSTABLE SWING-AWAY KNEE PADS

- NO READJUSTMENTS WHILE LOADING AND UNLOADING

SUPINE TO PRONE SEAMLESSLY CHANGE POSITION FROM 90° (SUPINE) TO 0° (VERTICAL) AND 20° PRONE
• WORK ON HEAD CONTROL IN THE ONLY STANDER THAT DOES NOT REQUIRE CHANGING PADS, FOOT PLATES, ETC. WHEN TRANSITIONING BETWEEN SUPINE AND PRONE POSITIONS

MULTI-ADJUSTABLE FOOT PLATES

- HEIGHT, ANGLE, ROTATION, AND DEPTH ADJUSTABLE FOOTPLATES ACCOMMODATE A WIDE RANGE OF LOWER EXTREMITY POSITIONING NEEDS

4-POINT BASE IS STABLE IN ALL POSITIONS
(SMALL OVERALL FOOTPRINT - SIZE 1 = 20"WX28"L)

VERTICAL

UP TO 20° PRONE

Zing's Biggest Advantages

- TRUE MULTI-POSITION STANDER
- FLAT-TO-LOAD TO 20° PRONE
- NO TRANSFERS OR HAVING TO CHOOSE BETWEEN SUPINE, VERTICAL, OR PRONE WITH OUR SVP (SUPINE-VERTICAL-PRONE) PIVOTING ACTION
- NO SWITCHING PADS, FOOT PLATES, OR TRAYS TO GO TO PRONE
- NO OTHER STANDER GOES FROM SUPINE TO VERTICAL TO PRONE LIKE THE ZING MPS

The Zing MPS — Multi-Position Stander enables smooth transitions between multiple positions — including flat-to-load transfer, supine, vertical, and up to 20° prone — without requiring adjustment of foot plates, pads, or trays, and without transferring the user out of the stander. These transitions can occur in a single, continuous motion through the system's unique SVP (supine-vertical-prone) pivoting mechanism.

The Zing MPS incorporates a unique pivot point that allows positioning beyond vertical, into prone. Adjustment can be made using either a foot or hand control ("Dual Control"), providing clinicians with flexible options for positioning and facilitating therapeutic use consistent with individualized care plans.

Prone positioning is sometimes used to promote head and trunk control. However, extended duration in this position may lead to fatigue, asymmetrical posture, or reduced standing tolerance. The Zing MPS enables adjustments in vertical orientation to allow brief rest periods — for example, transitioning from a prone position into partial supine — without discontinuing the standing session or compromising postural alignment. This capability represents a therapeutic opportunity not currently possible with other multi-position standers.

For safety and clinical appropriateness, a prone-position lockout is available when supine or upright only positioning is desired.

SUPINE POSITION

Z | Zing PEDIATRIC STANDING FRAMES

- ALL AVAILABLE WITH ABDUCTION

- MPS (MULTI-POSITION STANDER)
- MPS TT (TT=TILT-TABLE STYLE PADS)
- SUPINE
- SUPINE TT (TT=TILT-TABLE STYLE PADS)
- PRONE
- PORTABLE (EARLY INTERVENTION STANDER)

AVAILABLE IN 3 SIZES

• PORTABLE SIZE 1

• SIZE 1

• SIZE 2

VERTICAL AND ABDUCTION POSITION

Zing's Biggest Advantages

Zing's Biggest Advantages

TRUE HIP PIVOT LEG ABDUCTION

- Pivot points are in line with the hips, promoting proper alignment at the hips, knees, and ankles
- Feet maintain the angle with the rest of the legs - no wedges needed and no additional adjustment to the knees or foot plates
- Up to 15° (Portable) or 30° (Size 1 and 2) of abduction per leg - accomplished through a single knob
- Promotes musculoskeletal development for children during critical growth years
- Abduction can be used and adjusted in its full range throughout the entire positioning sequence - whether 20° prone or anywhere throughout the supine range

ROTATING HIP GUIDES

- Keeps the hips in symmetrical alignment
- Freely rotate as the abduction angle changes, hip guide bracket is also mounted to the legs so as abduction changes, the guides also move independently to provide consistent lateral support and reduce pressure points
- Eliminates the need to make adjustments prior to adjusting abduction angle

LEG PIVOT POINTS

- Leg pivot points are inline with the hips
- The offset bend in the leg tubes allows the entire leg to abduct without the need to adjust knee pads, foot plates or use wedges as the angle of the leg changes

LEG ABDUCTION

- Independent leg abduction is accomplished through a single knob
- Up to 30° of independent hip abduction possible
- Clearly marked angle indicators

PLENTY OF GROWTH AND EASY ADJUSTMENT

- **Portable:** Fits children up to to 36", and up to 36 lbs
- **Size 1:** Fits children up to 44", and up to 70 lbs
- **Size 2:** Fits children from 32"-60", and up to 154 lbs
- Variety of stander sizes and many components available in multiple sizes make starting a standing program earlier possible
- Can easily grow with the child and adapt to their changing needs
- Many supports, pads and straps are available in multiple sizes
- Comfortable transfer height with near flat loading makes transfers more manageable as children grow, transfer height is 32" for Size 1, 31" for Size 2
- Tool-free adjustment of all components
- Every adjustment can be made with a simple turn of a knob or ratchet handle

COMPONENTS IN MULTIPLE SIZES

|--|--|

REMARKABLY MODULAR

- Can be configured as a simpler stander using the TT pads and padded strapping options or configured with independently adjustable support and positioning options for the most complex needs
- Designed to grow with the child – options can be added as needed
- Great for a multi-user facility or school

PLANER PADS

FORM TO FIT PADS

TT PADS

ACCOMMODATING CONTRACTURES

- No special modifications are needed to accommodate children with contractures
- Using the multi-adjustable foot plates, multi-adjustable knee pads and the independent calf pads, it is possible to adjust for contractures in one or both sides independently
- A positioning system comprised of multi-adjustable foot plates and sandals, back of leg supports, multiple knee pads and strapping combinations, and multiple knee functionality and positioning options - creates a modular system with plenty of growth and easy adjustment that can accommodate leg length discrepancies, asymmetry, external leg and foot orthotics and contractures
